#### EDUCATION

#### **CUNY Hunter College**

New York, NY

Bachelor of Arts in Computer Science, Minor in Mathematics

Aug. 2019 - Jan. 2023

• Graduated with Cum Laude (GPA 3.7)

## EXPERIENCE

#### AI Model Quality Analyst

Apr. 2024 – Jul. 2024

Remote

- Data Annotation Tech • Reviewed AI model outputs for correctness, clarity, and adherence to instructions, providing detailed feedback
  - Interacted with various AI models to generate responses for diverse coding prompts and projects, ensuring relevance and quality
  - Assessed and validated code-related outputs from AI models, ensuring functionality and accuracy through rigorous testing

### Projects

#### Unscramble! iOS Game | Swift

Mar. 2022 – May 2022

- Developed a simple educational word game in which users create as many words possible from a randomized string
- Displayed definitions, parts of speech, and sentence examples for words found or missed to teach users new vocabulary
- Responsive Design; supports iPhones with screens at least the size of an iPhone CE
- Implemented options for users to manipulate the minimum and maximum length of the randomized string as well as the minimum length for acceptable answers

## Python Chat Application | Python

Jun. 2022 – Aug. 2022

- Developed a client-server chat application using the Python library tk for UI
- Implemented text, video, and voice functionality between two clients
- Measured latency and displayed client ping using the Python library time. Messages were in realtime.
- Code profiling and performance testing with the Python library cProfile and stats

#### **TVShows API** | C#, NuGet, MySQL

Dec. 2022 – Jan. 2023

- Developed a REST API with C# to provide users with information on select American Television Shows
- Created a relational database with MySQL to store and access shows' and users' data
- Implemented GET, POST, PUT, and DELETE endpoints for television shows, users, and user reviews
- Incorporated a user review system for users of the API that updated shows' scores based on the average of new and existing user reviews

#### Web Chat App | HTML, PHP, JavaScript, CSS, SQL

Sept. 2023 – Oct. 2023

- Developed a web chat app with user sign-up and login, private messaging, and chat logging
- Created a relational database with SQL to store and access user data
- Hosted and ran the web chat app locally with XAMPP Control Panel
- Implemented profile pictures for users and stores them in a local folder
- Dynamically updated pages for chat and list of users
- Incorporated parameterized SQL queries in php files to prevent SQL injections

#### TECHNICAL SKILLS

Languages: Python, C#, C++, MySQL, Swift, JavaScript, HTML/CSS

Frameworks: Ajax, Node.js

Developer Tools: Git, Xcode, VS Code, Visual Studio, XAMPP

Libraries: opency-python, tk, imutils, sockets, threaded, numpy, pipwin, pyaudio, cProfile, stats, and time
