PROFESSIONAL SUMMARY

Full-Stack Software Engineer who ships production web applications end-to-end with **React, Next.js, TypeScript, Node.js/Express**, and **MongoDB**. Has built **AI-powered features** that integrate the **Anthropic Claude API** with **prompt engineering** and multi-stage **LLM pipelines**, alongside core strengths in **RESTful API** design, **authentication**, **state management**, and **performance optimization**. Seeking full-stack or AI-focused software engineering roles to own features from architecture to deployment.

EDUCATION

- Georgia Institute of Technology** | *Master of Science in Computer Science* | Atlanta, GA Jan. 2026 - Present
- Current Coursework: Introduction to Information Security, Software Analysis
- Per Scholas** | *Certificate in Software Engineering* | Remote Aug. 2025 – Nov. 2025
- Completed an intensive, hands-on training program in full-stack web development using the MERN stack
- CUNY Hunter College** | *Bachelor of Arts in Computer Science* | New York, NY Aug. 2019 – Jan. 2023
- Minor in Mathematics | GPA: 3.7

EXPERIENCE

- Freelance Web Developer** | **Family Buddies** | Remote Apr. 2026 – Present
- Designed, built, and **shipped a responsive production website end-to-end** for a New York elderly-care service using **Next.js, TypeScript**, and **Tailwind CSS**, achieving a perfect **100 Lighthouse Performance and SEO** score
 - Built a server-side contact pipeline that persists submissions to **Google Sheets** via a service account, hardened against spam with **Cloudflare Turnstile** and a honeypot
 - Delivered accessible, mobile-first layouts with **Framer Motion** animations; deployed and maintained on **Vercel**
- Software Engineering Intern** | **GTechFin** | Remote Apr. 2026 – Present
- Independently designed, built, and **shipped a full-stack web application end-to-end** (architecture through production deployment) with minimal oversight
 - Owned the full development lifecycle across **coding, testing, and debugging**, collaborating with **cross-functional teams** and producing **technical documentation** as needed
 - Leveraged AI tooling (**Claude Code**) to accelerate development and sustain delivery velocity as a solo developer
- AI Model Quality Analyst** | **Data Annotation** | Remote Apr. 2024 – Jul. 2024
- Evaluated AI-generated **Python, Java**, and **C++** code for correctness, efficiency, and adherence to **best practices**, ensuring functional output through **unit testing**
 - Debugged and validated **multi-language outputs**, ensuring **functional** and **optimized solutions**
 - Provided technical feedback to improve AI code generation accuracy

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, C#, C++, Java, SQL, HTML5, CSS3
Frameworks & Libraries: React, Redux, Zustand, Node.js, Express.js, Next.js, Passport.js, Mongoose, .NET
AI / LLM: Claude Code, Gemini, Claude API, Prompt Engineering
Tools & Databases: Git, GitHub, Postman, VS Code, Vercel, Render, Netlify, MySQL, MongoDB
Software Testing: Unit Testing, Performance Testing, Code Profiling, Pytest, React Testing Lib, JUnit

PROJECTS

- AI Humanizer App** | *Next.js, TypeScript, Express, MongoDB, Anthropic Claude API* Apr. 2026 – June 2026
- Built a 3-stage, detector-aware text-rewriting pipeline (diagnose, rewrite, then chained re-humanization of borderline outputs) on **Anthropic Claude**; **100% of outputs scored human-leaning (under 50% AI on ZeroGPT)** across a 66-case benchmark, with roughly **85% under 30% AI**
 - Refined output through iterative **prompt engineering** with **Claude Code**, running measured cycles of targeted prompt changes and **deterministic post-processing**
 - Engineered the **Next.js** and **Express** application with **Clerk authentication**, **Stripe** usage-based billing, and per-user rate limiting on **MongoDB**
- PokéGuesser** | *React, Node.js, Express, MongoDB, Zustand, Passport.js, JWT, Fuse.js* Nov. 2025 – Dec. 2025
- Built a responsive **React** app with **Zustand** middleware to sync complex game state across **local storage** and a **cloud database**
 - Secured user sessions with a **Node.js/Express** API using **Passport.js** strategies and **JWTs** stored in cookies
 - Achieved near-instant search on a **1,000+ item dataset** with memoized fuzzy search via **Fuse.js**
